

Up to 50MW per plant of
mobile power anywhere you
need it

Benefits of the United Power Trailer Mounted LM2500:

- 2, 3, and 4 trailer designs available
- Mobile power plant based on the field proven GE LM2500 turbine platform (more than 500 in service with over 25 million hours of operation)
- ISO rated at 21 MW @ 60 Hz, 20 MW @ 50 Hz
- Low emissions and augmented power with water injection and our proprietary inlet fogging / wet compression systems
- Adaptable to any application
- Extremely mobile and easy to set-up and install
- Compact and light weight
- Gaseous, liquid, or dual fuel options available

United Power Group manufactures complete trailer mounted packages based upon the GE (LM1500, LM2500 / TM2500, LM2500 Plus, and LM6000), Rolls-Royce RB211, Allison 501, and Pratt & Whitney (FT8, GG4, and ST6) turbine platforms. Our proprietary designs are compact and ancillary systems are openly accessible for ease of maintenance with minimal down time.

United Power has the capability to manufacture four units at once with deliveries as short as four to six months for our United Power Mobile LM2500 package.
