

## Tailor Made Power Solutions

United Power manufactures complete land or barge based packages based upon the GE (LM1500, LM2500 / TM2500, LM2500 Plus, and LM6000), Rolls-Royce RB211, Allison 501, and Pratt & Whitney (FT8, GG4, and ST6) turbine platforms. Similar to our mobile unit design, our proprietary designs are compact yet conveniently arranged for ease of maintenance.

### Benefits of the United Power Stationary Power Package:

- UPG power plants utilize field proven GE, Rolls-Royce, Allison, and Pratt & Whitney turbine platforms
- Proprietary options to lower emissions and augment power with water injection and our proprietary inlet fogging / wet compression systems
- Adaptable to any application
- Easy to set-up and install with United Power's modular design
- Compact and light weight
- Gaseous, liquid, or dual fuel options available
- LTSA, Field Technicians, and Turbine Repair services available
